

WINNING THROUGH CUSTOMER SERVICE

VITAL CUSTOMER SERVICE

Winning customers is difficult, but keeping them is even harder. The way to customer retention is through exceptional customer service.

No organization can afford to lose customers because of poor service, yet many do. Customers remember how they've been treated by a company, and they tell others. Studies show that a dissatisfied customer is likely to never buy from that company again — even if it has exactly what they are looking for. When customers are pleased, they're likely to spend more on a product or service and will call again. If customer service representatives (CSRs) understand their role in the customer relationship, then they will keep customers returning.

COACHING AND DEVELOPMENT BRING SUCCESS

CSRs, sales and service representatives, service managers — anyone who has internal and external customer contact — are imperative to an organization. They are on the front lines of customer contact, and the way they manage customer relationships determines whether customers return.

The Vital Learning Winning Through Customer Service™ program uses a variety of interactive training methods to target the skills, behaviors and attitudes that have the greatest influence on understanding the customer and providing solutions. Vital Learning's unique approach allows organizations to customize their customer service training with both classroom and eLearning training. In addition, Winning Through Customer Service identifies the essential behavior/communication styles that will help representatives understand their customers' individual styles and needs.

Winning Through Customer Service trains sales and service personnel to present a professional image and to communicate effectively in everyday customer service transactions, as well as in difficult situations. These skills address the major concerns identified by more

than 50 organizations within the service industry and over 10 years of product field research. At the heart of this program is a step-by-step process for conducting a customer service transaction.

The program includes the following modules:

Your Role as a Professional
The Essential Communication Skills
The Customer Service Transaction
Dealing With Difficult Customer Situations

Throughout the course, customer service employees review video presentations and case studies, participate in group discussions, practice new skills, and receive immediate feedback. The program provides them with implementation tools, a troubleshooting guide and additional resources to help them apply the skills they have learned on the job. Available in classroom, eLearning and blended formats.
