## Introduction

**Behavioral research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment.**

A person's behavior is a necessary and integral part of who they are. In other words, much of our behavior comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behavior.

**In this report we are measuring four dimensions of normal behavior. They are:**

- How you respond to problems and challenges.
- How you influence others to your point of view.
- How you respond to the pace of the environment.
- How you respond to rules and procedures set by others.

This report analyzes behavioral style; that is, a person's manner of doing things. Is the report 100% true? Yes, no and maybe. We are only measuring behavior. We only report statements from areas of behavior in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

*"All people exhibit all four behavioral factors in varying degrees of intensity."  
—W.M. Marston*

## General Characteristics

*Based on Samuel's responses, the report has selected general statements to provide a broad understanding of his work style. These statements identify the basic natural behavior that he brings to the job. That is, if left on his own, these statements identify HOW HE WOULD CHOOSE TO DO THE JOB. Use the general characteristics to gain a better understanding of Samuel's natural behavior.*

Samuel embraces visions not always seen by others. Samuel's creative mind allows him to see the "big picture." He is goal-oriented and driven by results. He is the team member who will try to keep the others on task. Most people see him as a high risk-taker. His view is, "nothing ventured, nothing gained." He prefers an environment with variety and change. He is at his best when many projects are underway at once. Samuel is extremely results-oriented, with a sense of urgency to complete projects quickly. He is deadline conscious and becomes irritated if deadlines are delayed or missed. Many people see him as a self-starter dedicated to achieving results. He needs to learn to relax and pace himself. He may expend too much energy trying to control himself and others. Samuel seeks his own solutions to problems. In this way, his independent nature comes into play. He is a goal-oriented manager who believes in harnessing people to help him achieve his goals.

Samuel will work long hours until a tough problem is solved. After it is solved, Samuel may become bored with any routine work that follows. He likes to make decisions quickly. He is a good problem solver and troubleshooter, always seeking new ways to solve old problems. He prefers authority equal to his responsibility. Samuel is decisive and prefers to work for a decisive manager. He can experience stress if his manager does not possess similar traits. He should realize that at times he needs to think a project through, beginning to end, before starting the project. Sometimes he may be so opinionated about a particular problem that he has difficulty letting others participate in the process. He has the unique ability of tackling tough problems and following them through to a satisfactory conclusion.

## General Characteristics Continued

Samuel tends to be intolerant of people who seem ambiguous or think too slowly. He challenges people who volunteer their opinions. His creative and active mind may hinder his ability to communicate to others effectively. He may present the information in a form that cannot be easily understood by some people. He may sometimes mask his feelings in friendly terms. If pressured, Samuel's true feelings may emerge. Samuel may lack the patience to listen and communicate with slower acting people. He should exhibit more patience and ask questions to make sure that others have understood what he has said. He may lose interest in what others are saying if they ramble or don't speak to the point. His active mind is already moving ahead. He tends to influence people by being direct, friendly and results-oriented.

## Value to the Organization

*This section of the report identifies the specific talents and behavior Samuel brings to the job. By looking at these statements, one can identify his role in the organization. The organization can then develop a system to capitalize on his particular value and make him an integral part of the team.*

- Self-starter.
- Forward-looking and future-oriented.
- Ability to change gears fast and often.

## Natural and Adapted Style

*Samuel's natural style of dealing with problems, people, pace of events and procedures may not always fit what the environment needs. This section will provide valuable information related to stress and the pressure to adapt to the environment.*

### Problems - Challenges

#### Natural

Samuel tends to deal with problems and challenges in a demanding, driving and self-willed manner. He is individualistic in his approach and actively seeks goals. Samuel will attack problems and likes a position with authority and work that will constantly challenge him to perform up to his ability.

#### Adapted

Samuel sees no need to change his approach to solving problems or dealing with challenges in his present environment.

### People - Contacts

#### Natural

Samuel is enthusiastic about his ability to influence others. He prefers an environment in which he has the opportunity to deal with different types of individuals. Samuel is trusting and also wants to be trusted.

#### Adapted

Samuel feels the environment calls for him to be sociable and optimistic. He will trust others and wants a positive environment in which to relate.

## Natural and Adapted Style Continued

### Pace - Consistency

#### Natural

Samuel is comfortable in an environment that is constantly changing. He seeks a wide scope of tasks and duties. Even when the environment is frantic, he can still maintain a sense of equilibrium. He is capable of taking inconsistency to a new height and to initiate change at the drop of the hat.

#### Adapted

Samuel sees his natural activity style to be just what the environment needs. What you see is what you get for activity level and consistency. Sometimes he would like the world to slow down.

### Procedures - Constraints

#### Natural

Samuel is independent by nature and somewhat self-willed. He is open to new suggestions and can, at times, be seen as somewhat freewheeling. He is most comfortable in an environment where the constraints can be "loosened" for certain situations.

#### Adapted

Samuel shows little discomfort when comparing his basic (natural) style to his response to the environment (adapted) style. The difference is not significant and Samuel sees little or no need to change his response to the environment.

## Adapted Style

*Samuel sees his present work environment requiring him to exhibit the behavior listed on this page. If the following statements DO NOT sound job related, explore the reasons why he is adapting this behavior.*

- Questioning the status quo, and seeking more effective ways of accomplishment.
- Working without close supervision.
- A competitive environment, combined with a high degree of people skills.
- Dealing with a wide variety of work activities.
- Moving quickly from one activity to another.
- Anticipating and solving problems.
- Quickly responding to crisis and change, with a strong desire for immediate results.
- Meeting deadlines.
- Skillful use of vocabulary for persuasive situations.
- Persistence in job completion.
- Exhibiting an active and creative sense of humor.
- Handling a variety of activities.

## Areas for Improvement

*In this area is a listing of possible limitations without regard to a specific job. Review with Samuel and cross out those limitations that do not apply. Highlight 1 to 3 limitations that are hindering his performance and develop an action plan to eliminate or reduce this hindrance.*

### Samuel has a tendency to:

- Be impulsive and seek change for change's sake. May change priorities daily.
- Set standards for himself and others so high that impossibility of the situation is common place.
- Fail to complete what he starts because of adding more and more projects.
- Be explosive by nature and lack the patience to negotiate.
- Be so concerned with big picture; he forgets to see the little pieces.
- Have trouble delegating--can't wait, so does it himself.
- Have no concept of the problems that slower-moving people may have with his style.
- Dislike routine work or routine people--unless he sees the need to further his goals.

## The Success Insights® Wheel

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree you are adapting your behavior.
- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.
