my
eNovation

What are the challenges in manual program?

Complex submission

Online systems receive more ideas than paper based systems because of fewer physical barriers for submitting ideas

Slows down entire process

Physical dependency of each individual involved, tremendously slows down the overall process

Lack of timely feedback

Timely feedback is a major block to the success of manual program

Geographical & Time constraint

Manual process always have geographical and time constraint which limits the scope

Time consuming and challenging

Segregation of data is always time consuming challenging activity

Lack of consolidated analysis

Lack of data consolidation always make leadership struggle to understand employee contribution, process timelines, budget spent and benefits gained

What is the perfect solution?

Zero manual work

Digital platform for employees to submit Suggestions, Concerns, Surveys & many more

Fully automaton for faster processing

Easy participation through Web & Mobile App

my eNovation

Secure platform with high availability

On click Analysis, Graphs & Reports

Artificial Intelligence based Escalation, Communication & Analytics

Suggestion Box | Survey Box | Concern Box | Audit | TPM Tagging | DWM | Incident Management
